SUMMARY

I am a dependable employee seeking opportunity to expand skills and contribute to company success. Considered hardworking, ethical and detail-oriented. Also a versatile software development professional successful producing robust systems to meet diverse customer needs. Explores technical capabilities and push boundaries to exceed expectations. I am willing to take on any task to support team and help business succeed and I offer strong Frontend and Backend skills.

EXPERIENCE

Full Stack Developer

09/2021 - 05/2023

Sellerpoint

- Followed Agile Scrum methodology in developing software.
- Wrote the building blocks of the app (base components, graphs, tables, form components, etc.) and created Storybook for the components.
- Version 1 (formerly called Volv) used Nuxt 2 and Laravel. Re-built Sellerpoint's components using Vue 3 and tailwindCSS.
- Helped debug, fix, and write additional functionalities in the backend.
- Reviewed pull requests from teammates.

Frontend Developer

01/2021 - 10/2021

LemonSwan GmbH (lemonswan.com)

- Helped the company materialize their version 2 of their web-based dating app. App was built using Vue 3 and Laravel/Inertia for the backend.
- Translated Figma designs into code pixel-perfectly.

Software Engineer

06/2020 - 01/2021

Experience Digital

- Collaborated with designers and development teams to create high-quality interactive web experiences.
- Analyzed software requirements and worked with team members to develop solutions.
- Developed web-based applications with Vue/Nuxt for frontend and Laravel (PHP) or Adonis (Node.js) for the backend.
- Wrote, organized and distributed technical documentation.

Software Engineer

12/2019 - 06/2020

Ocom Software

- Developed features and added functionalities to multiple apps/software. Main stack was Vue.js for the frontend and Django for the backend. Company has its own boilerplate/builder which was used to bootstrap apps in Django and Vue.

Web Developer

03/2019 - 12/2019

3EBoosting

- Developed, designed, tested, and debugged web-based application built with Vue.js for the frontend and pure PHP for the backend. Project was launched and gained a number of users.

EDUCATION

Computer Engineering

2019

Western Leyte College - Bachelor of Science (B.S.)

- Studied computer architecture and robotics.
- Created multiple projects with Arduino and Raspberry Pi.
- Learned and practiced writing Assembly language to program the hardware directly.
- Learned and practiced building electronic circuits.
- Created projects such as Line Following robot using PIC Microcontrollers and Logic gates.
- Built a PUV terminal kiosk using Raspberry PI to generate and print QR Code for each PUV passengers and android app to scan it and verify if the ticket is valid. A PHP and Vue application was created for the frontend of the app and show relevant information such as PUV schedules and ticket booking system.
